

# The Time To Commit is Now!

*Are you ready to help make Maryland a leader Global Warming Solutions?*

## Come to the Annapolis Town Hall Meeting

*Global warming has the potential to catastrophically impact Maryland. With over 3,100 miles of coastline, Maryland is one of the most vulnerable states in the nation to sea-level rise. The state must commit to real science-based reductions of global warming pollutants, and can do so by passing the Global Warming Solutions Act. Join us for an interactive Town Hall Meeting, and show your support for global warming solutions!*

### What is Global Warming Solutions Month?

It is a large-scale grassroots mobilization across the state to educate and active citizens to take action on global warming. The MD Commission on Climate Change draft report is due in mid-November and we need to ensure that they commit to science-based enforceable climate solutions. That is where you come in. We need to make sure they know that Maryland cares about global warming!
